

Trauma Fellowship at Indian Spinal Injuries Centre, New Delhi

Duration – 12 weeks

Sponsor – Smith & Nephew

How to apply – Visit [isiconline.org](http://isiconline.org)

Trauma is a time sensitive disease that can affect anyone anytime. The accident victim is a special patient and initial treatment requires crucial decisions taken on incomplete information. It is estimated that more than 80% of accident patients have musculoskeletal injuries and the orthopaedic surgeon has a vital role to play.

The fellowship aims to:

1. Deepen understanding of resuscitation and rehabilitation
2. Upgrade pre-operative planning ability
3. Refine motor skills during surgery
4. Develop analytical abilities in interpreting post fixation radiographs
5. Enhance presentation skills
6. Participate in post-graduate education, trauma meets and clinical classes.

A certificate on completion will be awarded.
